Details of Section A-A:

Reference: 3D Data received from TVS

Glass Thickness: 5mm.

Flange Thickness: 1.6mm

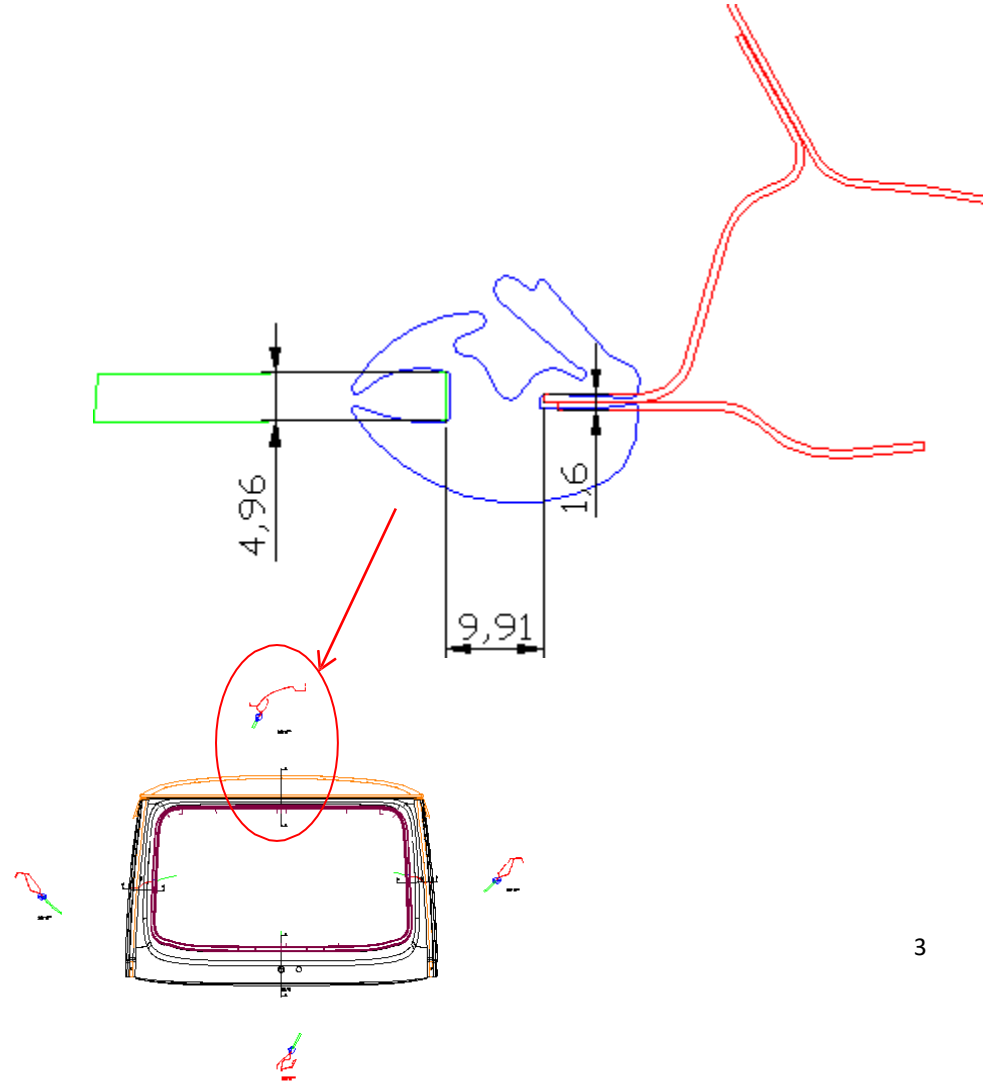

Gap Between Glass & Flange: 10mm

Concerns observed:

1. Stealing of glass
2. Glass loose and falling down

Root Cause analysis:

Improper locking of the profile & glass after assembly on the vehicle

THRASHER SEAL

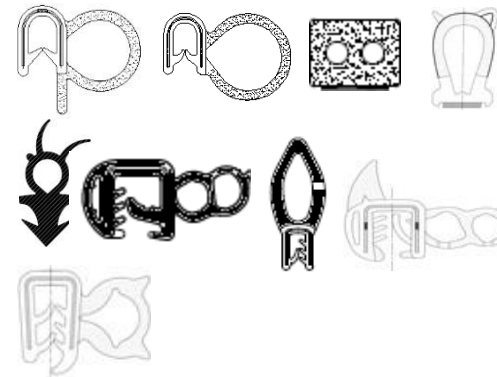

ENGINE HOOD
SEAL

TRACK STRAP

CABIN SEAL

BONNET SEAL

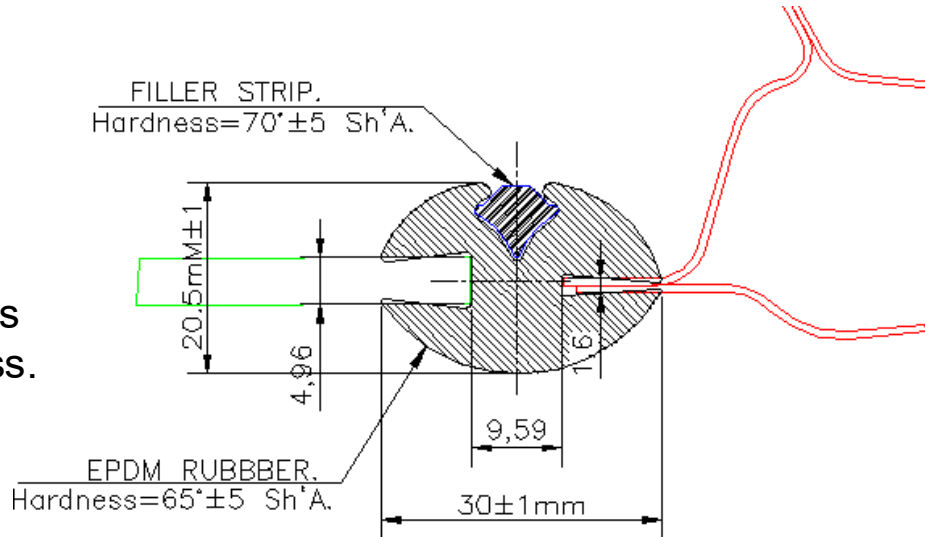

Considerations:

Profile thickness considered based on the filler gap between glass and BIW edge.
Profile will be with straight joint.

Advantage:

- 1) Profile has been designed such a way there is no need to change either the body panel or glass.
- 2) In old design Glass could be easily removed from Body, In new design Glass cannot be removed without cutting out or removing rubber
- 3) No water leaking from glass or body

GSSG PROPOSAL WITH COMPLETE NEW DEVELOPMENT.
WITH NO CHANGE IN GLASS SIZE AND BODY FRAME.

Section cut A-A
Scale: 1:1
